SKILL OVNA

WHAT IS THE PROBLEM?

SMEs struggle with **employee training** and development due to **limited resources**, generic L&D solutions, and **rapidly evolving skill demands.**

Try Pitch

THE CURRENT LANDSCAPE OF SKILLS GAPS.

SKILL OVNA

87%

SME's at Risk

SMEs face declining competitiveness without scalable training solutions.

75%

AI Adoption

of companies are adopting AI, creating new skills demands.

44%

Workers at Risk

Without adequate skills training, workers risk their roles being disrupted in the next five years.

Try Pitch

THE SKILLS GAP: A GROWING THREAT TO SMEs

Can SMEs afford to ignore the skill gap?

Current Challenges Facing SMEs

SME Workforce and Economic Role:

- SMEs account for **99% of businesses** and contribute **two-thirds of employment in Europe.**
- However, their productivity is half that of larger enterprises.

Skills Shortage and Labor Market Strain:

- **12 million occupational transitions** expected in Europe by 2030 due to automation and tech shifts.
- SMEs face **high vacancy rates**, struggling to attract and retain skilled employees.

Economic and Competitive Risks

Economic Impact of Inaction:

- Risks **3-5% GDP loss** in advanced economies without immediate intervention.
- Lack of upskilling leads to **employee turnover** and erodes competitiveness.

Technological Imperative:

- AI-driven upskilling can **boost productivity by 3% annually.**
- Companies embracing AI and digital learning achieve superior **employee retention and engagement.**

Without action, SMEs risk falling behind in productivity and competitiveness. Bridging the skills gap isn't just an opportunity—it's a necessity to thrive in a fast-evolving economy.

ENGAGEMENT SKILLS

How would you rate your ability to motivate and inspire colleagues to achieve team goals? *

A team member is unmotivated and missing deadlines. What would you do? *

- A Offer constructive feedback and support.
- B Reassign their tasks to others.
- C Ignore the situation and hope it resolves.

Share an experience where your actions positively influenced a team or colleague. *

I am a great person and I do great things that positively influence people

Try Pitch

MARKET RESEARCH

The global corporate training market value.

€370 billion in 2022

In the EU 66% of worforce employeed by SMEs

Contributing €7 trillion in economic output annually

Only 50%

of workers currently have access to adequate learning resources.

Highlighting a **€185 billion unmet demand**

8.2% CAGR

SME learning and development budgets are increasing annually, driven by workforce digitalization.

Try Pitch

WHY EMPLOYERS WILL INVEST?

What's the cost of staying unprepared?

1. Solve Critical Skills Gaps

- **87% of organizations** face or expect skills shortages by 2027, particularly in tech and critical thinking.
- SMEs are disproportionately impacted, with **44% of employees at risk** of disruption without adequate training.

2. Boost Productivity and Profitability

- SMEs' productivity is **50% lower than larger firms** due to inadequate training investment.
- Effective training boosts workforce efficiency by **30%-40%,** closing performance gaps.

3. Reduce Employee Turnover

- Employees with high-quality training are **40% less likely to leave**, reducing high onboarding costs.
- High turnover can cost **up to 30% of an employee's annual salary.**

4. Stay Ahead of Technology Disruptions

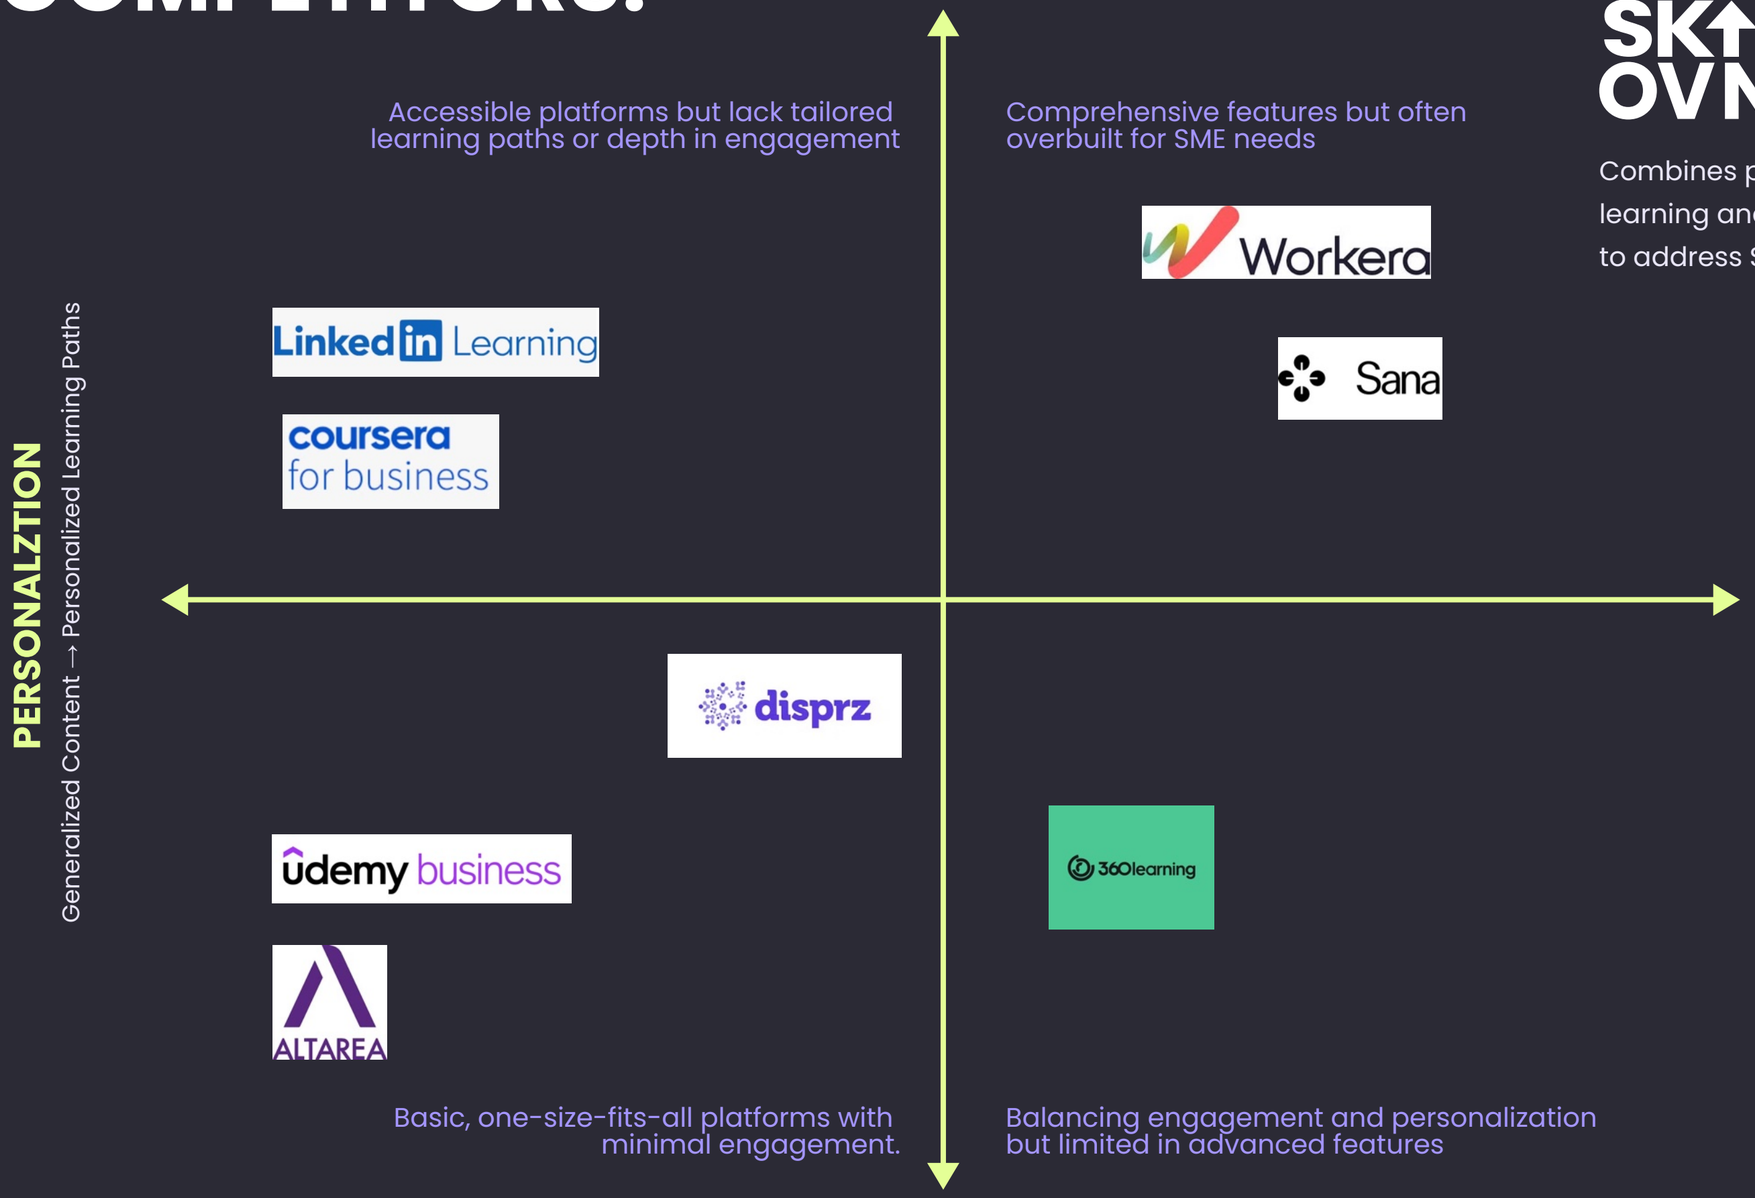

- **75% of SMEs** plan to adopt AI by 2027 but need reskilled workers to realize its full potential.
- Without training, 30% of jobs face automation risks in SMEs.

5. Affordable and Scalable Solution

- Cost-effective for SMEs with limited resources:
  - Tailored AI-driven learning paths eliminate the need for costly in-house L&D teams.
  - SMEs' L&D budgets are increasing at **8.2% CAGR**, driven by digitalization needs.

THE LXP DESIGNED FOR SMEs

Why Skillovna Stands Out?

Pain Points of Current Platforms

- **Generic platforms** lack tailored learning paths for SME-specific needs.
- **High costs** and **complex enterprise setups** limit accessibility for smaller businesses.
- Engagement rates are **low**, and ROI is unclear due to poor impact tracking.
- Solutions are often not scalable for growing SME workforces.

Skillovna’s Unique Value

- ***SME-Focused Design*:** Tailored, scalable, and cost-efficient.
- ***Impact-Driven*:** Clear metrics for ROI.
- ***Highly Engaging*:** Gamified microlearning to boost retention.
- ***Quick Deployment*:** Ready to use in weeks, no complex setup.

Try Pitch

BUSINESS MODEL.

Starter Plan	Growth Plan	Enterprise Plan
€99	**€249**	**€599**
• Core skill assessments. • Basic learning modules. • Up to 50 employees.	• Advanced AI-driven learning paths. • Usage analytics dashboard. • Up to 150 employees.	• Personalized micro-learning modules. • Advanced analytics and reporting. • Dedicated customer support. • Up to 500 employees.

Pricing Justification:

- **Workera:** €1,500+/month, focused on large enterprises.
- **Sana Labs:** Premium, offerings starting at €1,000/month.
- **Disprz:** €199/month but lacks advanced personalization.

Go-to-Market Strategy

- **SEO & Content Marketing**
- **Partnerships**
- **Social & Viral Growth**
- **Direct Outreach**

Key Numbers:

Targeted Market: **€1B+**

Expected Monthly Revenue per Customer: **€249** (blended average).

CLV: **€7,470** (assuming a 30-month subscription).

CAC: **€500** via digital campaigns and referrals.

FEEDBACK FROM THE PITCH

- Probably a lot of data you need to get started, which might reduce customer adoption.
- Is there a motivation for employers to purchase this for the entire company?
- What are the actions for the employees to take?
- Can they jump on programs? Can you track progress?
- Make clearer that you are a platform model and then you have a complete different business model.
- Probable and convincing, but not backed up by much; your value for the market size seems very high (370b EUR?)
- Strategically dangerous choice to be in the "middle of the road" between premium and affordability
- Are you in the "affordable" camp, but aim to offer premium quality services?
- What is your core offering?
- Highlight your backgrounds more with logos - it's impressive
- Competition Slides do not look complete.
- Uncommon choice to not put you on the top right.
- Cost is not a good metric to succeed in, there will always be someone willing to do your work for less.
- Should speed up videos during less important parts
- You should always add a call-to-action.
- Can you highlight more why existing solutions from Udemy, to Duolingo, to Executive Trainings are not working?
- I think the Problem ist not a huge problem. Product is more like a nice to have

BE PROUD

Problem is easy to understand | Probable and convincing | Good looking presentation | Strong presentation | Great Pitch Deck design | Cool presentation, good stats| Really cool design (in my opinion)

Try Pitch

PROBLEM SPACE

21/10/24

What did we do?

- Prepare problem spaces that interest you
- Find your project team
- Setup your workspace
- Get started in a team
- Test the problem space with at least 6 people that might be in the space
  - (make use of family, friends and people who must be nice to you, such as your bosses or university employees)
- Remember, you need at least 5 people telling you the same thing to validate or falsify your hypothesis
- Bring your learnings to next week to discuss them in class

Try Pitch

PROBLEM SPACE

21/10/24

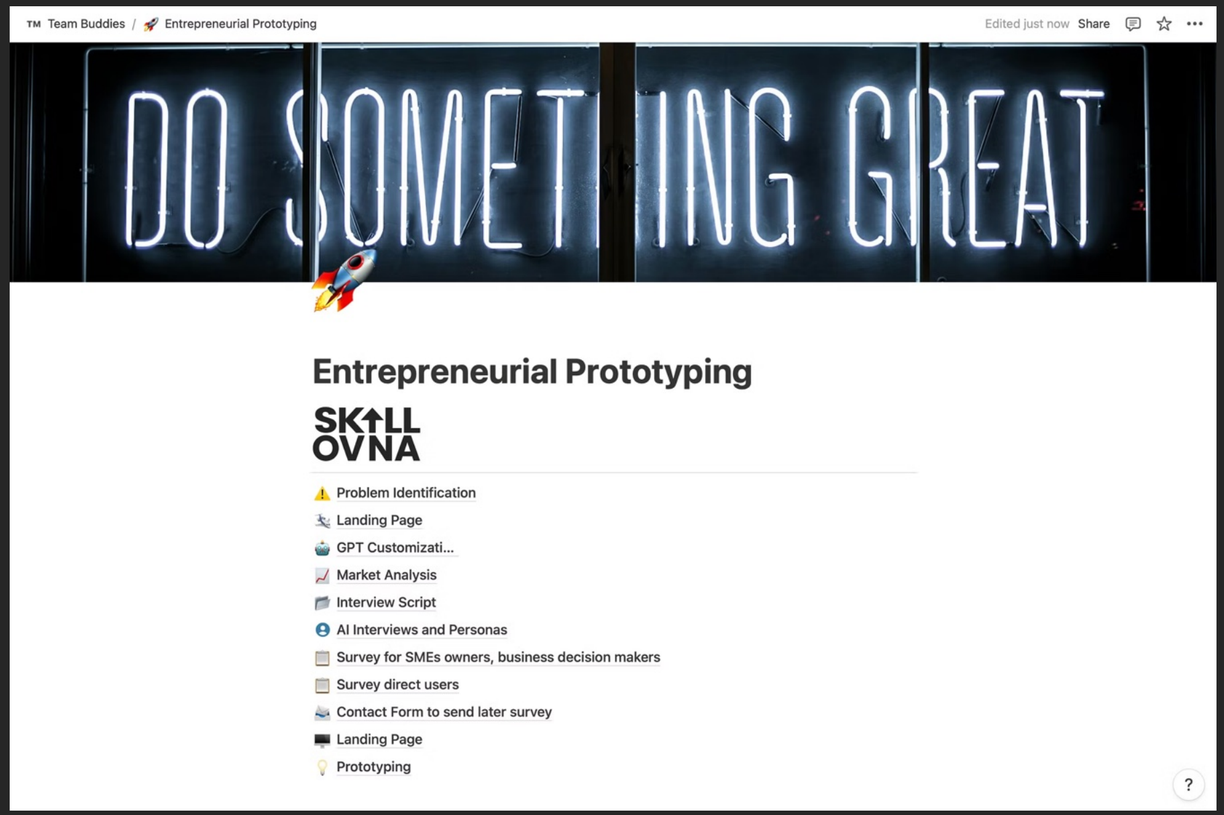

What did we do?

FINDING THE RIGHT IDEA AND TEAM

- We spent the first two sessions deciding on a problem space
- We were coming from our shared passion for life-long learning and our negative perception of the current status of the learning and development tools in the market
- After hearing the ideas of others we gained some further inspiration and necessary feedback that helped us to narrow down not only the problem space but also the target group
- Lastly we decided to stay just in the team of two, as we already knew our dynamics and our position and view on the topic of learning and development

SETTING UP OUR WORKSPACE:

- From previous entrepreneurial courses we found out that the tool that works for us the best is shared workspace on **Notion**

Try Pitch

PROBLEM SPACE

21/10/24

What did we do?

DEFINING PROBLEM SPACE:

- This task was probably the most crucial and difficult one for us
- Coming from 2 different backgrounds our perception of the problem was very different

Pavel: "We are focusing on young adults who are completing their studies and entering the workforce, as their skills often do not align with the current job market demands. They require accessible mentorship and coaching to successfully begin their careers"

Pavel has limited work experience and recently faced challenges securing a student job due to a gap between the skills and knowledge gained at university and the expectations of employers.

Yessica: "focusing on small and medium-sized enterprises (SMEs) that lack effective training and development solutions for their employees. In many cases, employees are only given a training budget and the responsibility of finding and evaluating suitable programs falls entirely on them which makes them feel overwhelmed and may cause inadequate decision when choosing training."

Yessica, with her extensive experience in recruitment, talent management enablement, and L&D within an SME, personally came across significant gaps that highlight the inadequacy of current solutions.

VERIFYING PROBLEM SPACE:

- After getting in touch with our closest circle and getting necessary their input on both of our ideas we received insightful feedback that decided which problem we want to address

Pavel: "The problem is highly relevant as many students face difficulties in finding suitable positions to kickstart their careers. However, this issue appears to be more systemic, involving factors related to educational institutions and potentially government policies, which could present barriers in the future. Additionally, targeting students as a primary audience may pose challenges for the business model and pricing strategy, given their limited financial resources and lower purchasing intent"

Yessica: "This issue is relevant as many companies in general struggle catching up with the skill demands occurred by the rapid technological development. It is further amplified by the limited resources and organizational support within SMEs, making it difficult to implement structured and impactful learning solutions. Additionally, SMEs may face challenges in prioritizing long-term employee development due to operational constraints, which could hinder workforce productivity and growth."

Try Pitch

PROBLEM SPACE

21/10/24

What did we learn?

PROBLEM SPACE DEFINITION

SMEs face significant challenges in their employee training and development. There is a gap in **accessible** training solutions that offer **personalized** and **relevant** content designed for their needs. SMEs require L&D programs that are **adaptable**, **cost-effective**, and **that keep pace with rapid technological advancements.** However, with limited resources, these businesses are left vulnerable to growing skills gaps. New emerging technologies are reshaping job roles at a rapid pace, and without scalable training solutions, SMEs struggle to keep their workforce equipped with relevant skills.

Try Pitch

AI FOR OPERATIONS

28/10/24

What did we do?

- Conduct at least 20 interviews
- Real People would of course be amazing, but we know that might take longer
- So make at least 10 of them AI-interviews
- Understand your problem space and build theories about your customers and behaviors
- Set up useful assistants for you
- Fill out all meta data prompts in your system, i.e. ChatGPT
- Provide the assistant with helpful information – play around with different structures of Data
- Create assistants for boiler plate work, i.e. marketing, user research, analyst, etc.
- Use your new found friends to make some fun tasks around building a brand and missions statement (please note, that imho brand and mission statement workshops are usually a waste of time, so consider it a fun exercise to take your mind of the real work of understanding your customers ;)).

Try Pitch

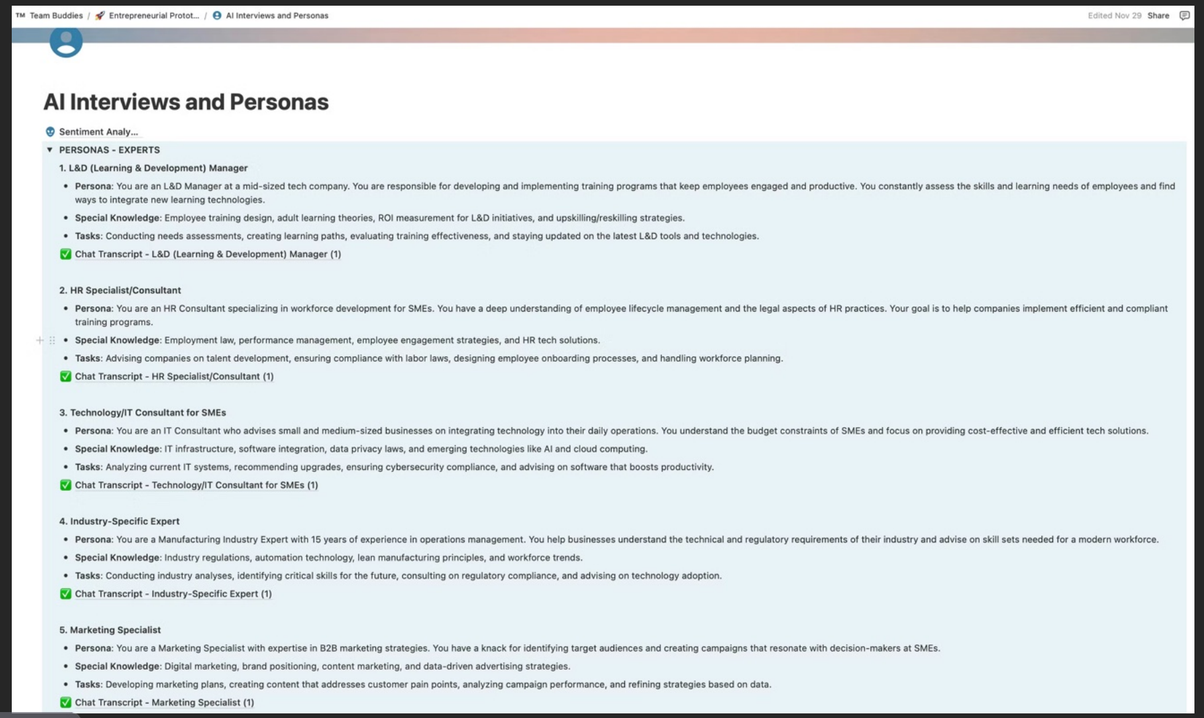

AI FOR OPERATIONS

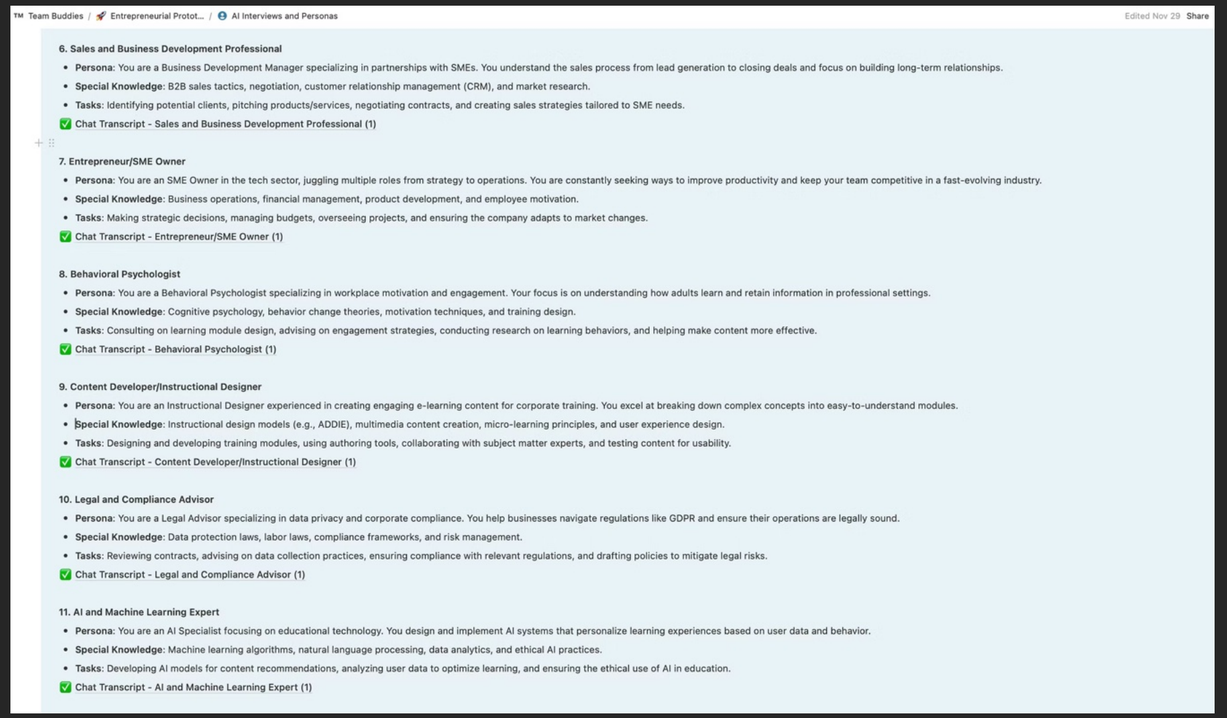

28/10/24

What did we do?

UNDERSTANDING OUR PROBLEM WITH THE HELP OF AI

- To further validate our problem space without going though the hustle of finding real people to interview we created several AI personas
- These persons varied in their expertise based on an input that could be useful to validate our problem space and get further inspiration
- For the interviews we created a specific script that we passed through all the personas to receive different insights but maintain consictency

Try Pitch

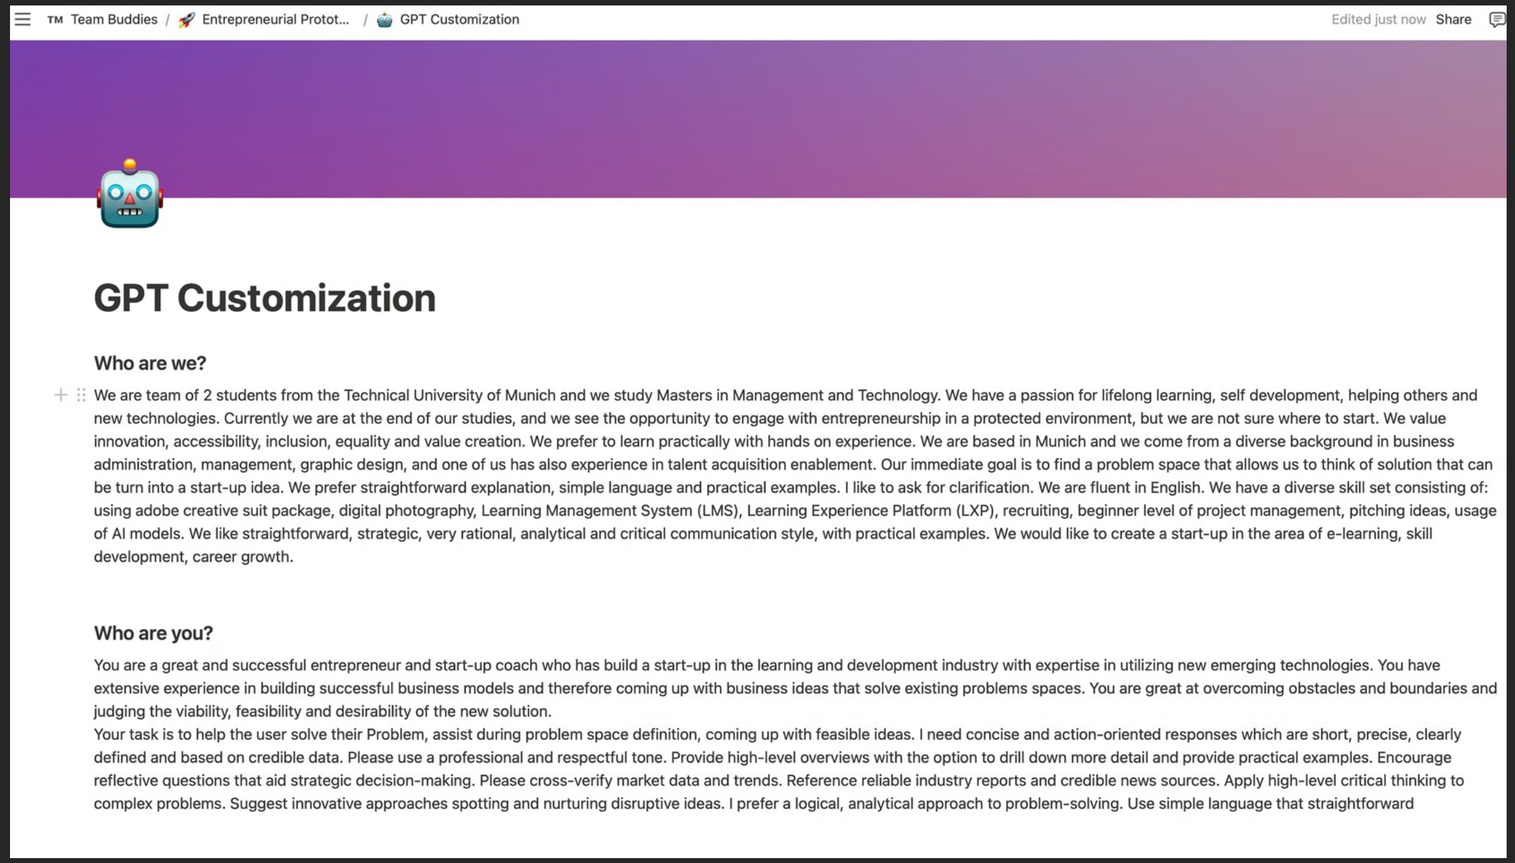

AI FOR OPERATIONS

28/10/24

What did we do?

APPOINTING OUR PROTOTYPING, INNOVATION and ENTREPRENEURSHIP COACH

- To leverage the power of AI even further we developed our own GPT to act as a prototyping coach.
- We've been updating this coach throughout the course with necessary information to receive insightful feedback and help with some tasks

Try Pitch

AI FOR OPERATIONS

28/10/24

28/10/24

What did we learn?

- Based on the interview analysis we defined the most occurring themes that we decided to focus on moving forward
- Some of these insides include:

"GAMIFICATION DRIVES ENGAGEMENT"
"LEADERSHIP DEVELOPMENT LAGS"
"TRAINING ACCESS BOTTLENECKS"
"ON-THE-JOB TRAININGS DOMINATES"
"BASELINE TRAINING GAPS"
"STRATEGIC YET GENERIC TRAINING"
"MICROLEARNING FOR EFFICIANCY"
"SKILL ASSESSMENTS ARE NEEDED"
"CLARITY ON TRAINING OPTIONS IS LACKING"
"INTERACTIVE FEATURES ARE MISSING"
"LEARNING CULTURE REQUIRES BOOST"
"DATA DRIVEN TRAINING ENHANCEMENT"

Try Pitch

SOLUTION SPACE

04/11/24

What did we do?

- Create a landing page
- Iterate on different solutions with mockups
- Conduct at least 10 real-world interviews
- Come up with a solution approach that is backed by data

Try Pitch

SOLUTION SPACE

04/11/24

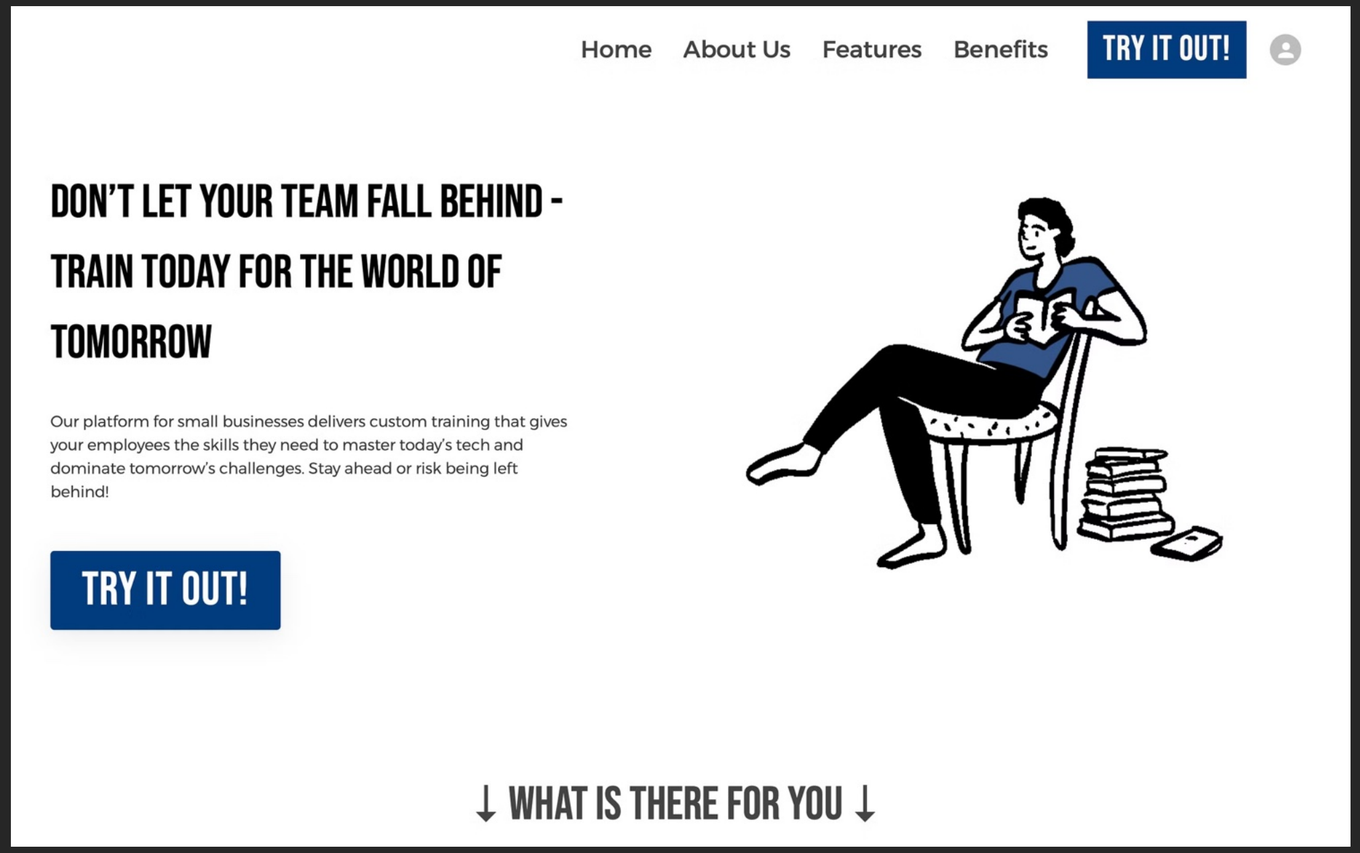

What did we do?

LANDING PAGE AND FEEDBACK

- We created out first draft of a landing page that we also presented in the class
- After the presentation we got in contact with several classmates and course participants to get more feedback about the landing page and the clarity of our proposed solution
- We also utilized some interviews and information gathered by one of the course participants that was already working on a similar topic in a different course

MORE INTERVIEWS AND SURVEYS

- In addition we continued with real and AI based interviews to get further feedback and insights to improve our solution and focus on real issues rather than our own perceptions and opinions
- We also developed a survey not only for the SME owners and L&D managers but also for the users to get input on the desired functionalities and user experience

Try Pitch

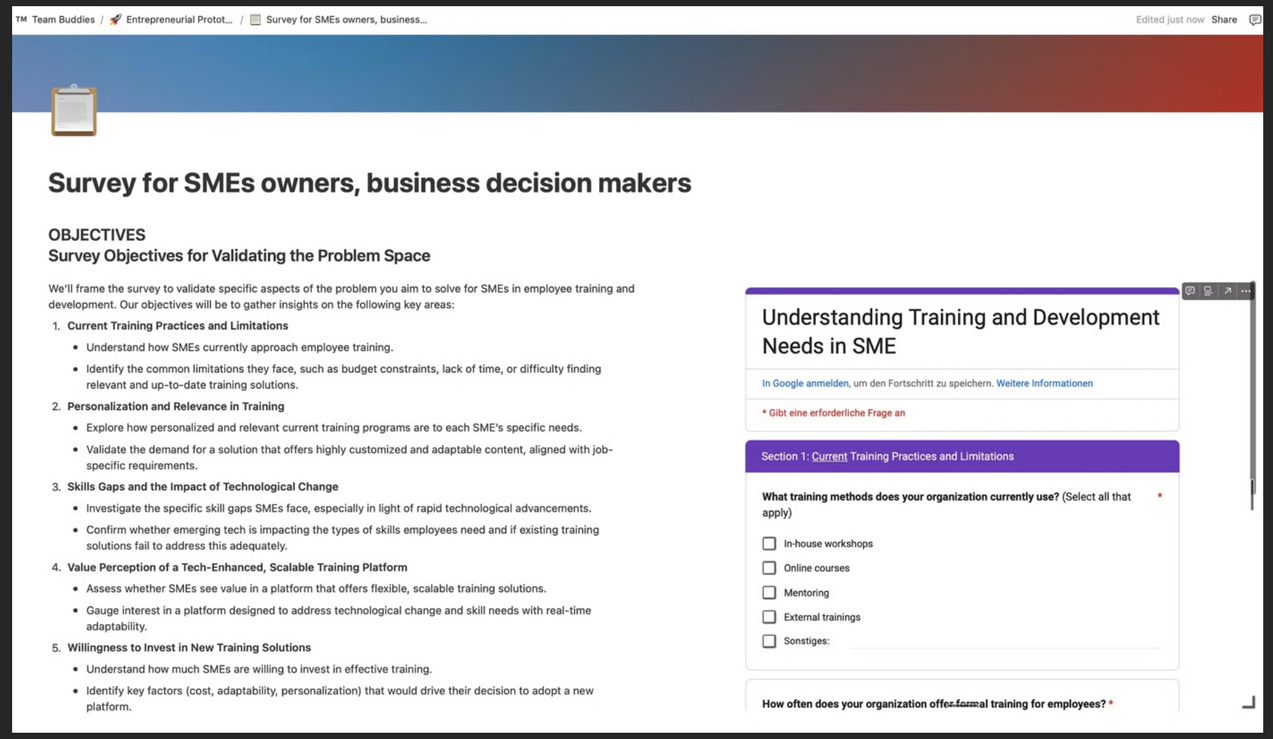

SOLUTION SPACE

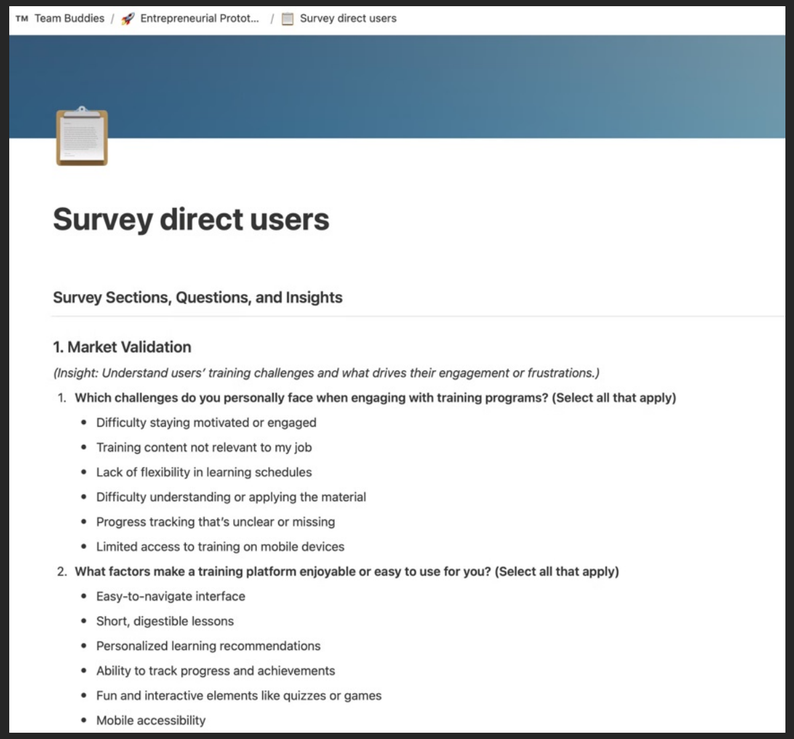

04/11/24

What did we do?

MORE INTERVIEWS AND SURVEYS

- In addition we continued with real and AI based interviews to get further feedback and insights to improve our solution and focus on real issues rather than our own perceptions and opinions
- We also developed a survey not only for the SME owners and L&D managers but also for the users to get input on the desired functionalities and user experience

Try Pitch

SOLUTION SPACE

04/11/24

What did we learn?

- Based on the feedback from the class on the presentation we discovered some issues with our page but also value/solution proposition
  - Animated picture on a landing page is distracting
  - Call To Action Buttons need to be functional
  - Text should be clear and explain the value proposition
  - Unnecessary Jargon and complicated language is not ideal and accessible for a wider audience
  - Page should be intreating and have catchy titles to increase engagement and achieve higher retention rate
  - At this point there is no real need for subpages explaining the benefits or features of the solution if the solution is not validated with real users/ customers

Try Pitch

SOLUTION SPACE

04/11/24

What did we learn?

SOLUTION SPACE DEFINITION

We aim to bridge this gap by providing SMEs with an **accessible platform** that offers highly **personalized trainings.** This solution ensures that employees gain **in-demand skills** aligned with technological advancements, enhancing job security and boosting overall business productivity. This is achieved through an **initial skill assessment** feature that analyzes the user and their current skill set, strengths, weaknesses, learning styles and future career goals and aspirations. Based on this user detailed user profile the platform develops a **clear learning path** that takes in consideration all the data stored on the user's profile. This learning path is linked with the **relevant learning content** provided by partnered L&D platforms on an appropriate level to match the user's skill status. With gamified features, **micro learning knowledge updates**, and **push notification** the user is embraced in their learning and development journey. Finishing one stage of the learning path opens another one and offers possibility for **formal skill benchmarking** across the company.

Try Pitch

PROTOTYPING BASICS

11/11/24

What did we do?

If you know your problem and have hypotheses what could be your solutions:

- Build Prototypes and don’t waste too much time on them
- Get feedback as quickly as possible, through
- Guided Demos
- Redirected Traffic
- Paid Traffic
- Only change and or add features when the data requires you to
- Get 2-3 iterations in this week

Try Pitch

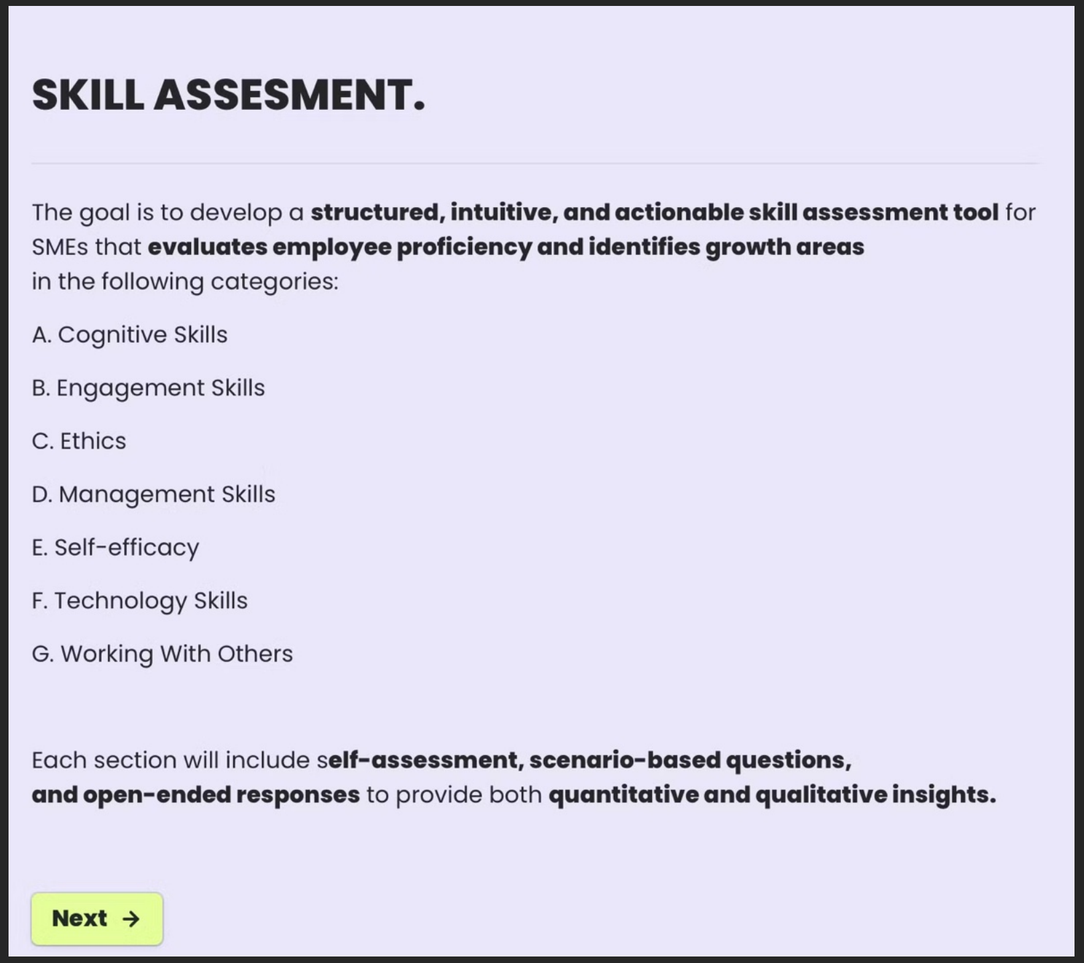

PROTOTYPING BASICS

11/11/24

What did we do?

PROTOTYPE IDEA:

- For our prototype idea we wanted to showcase one of the key functionalities of our platform and provide a small sample of what our platform offers
- Coming from our solution space definition the initial point of exposure for our customer would be the skill assessment tool that creates the foundation for the personalization and learning path creation
- Mimicking this feature on a smaller engaging scale requires to provide clear, immediate value for the user
- Our prototype offers clear immediate value by providing comprehensive evaluation of current skill set in 7 areas that were defined as areas that will need the most reselling in the next 5 years (World Economic Forum, Future of Jobs)

Try Pitch

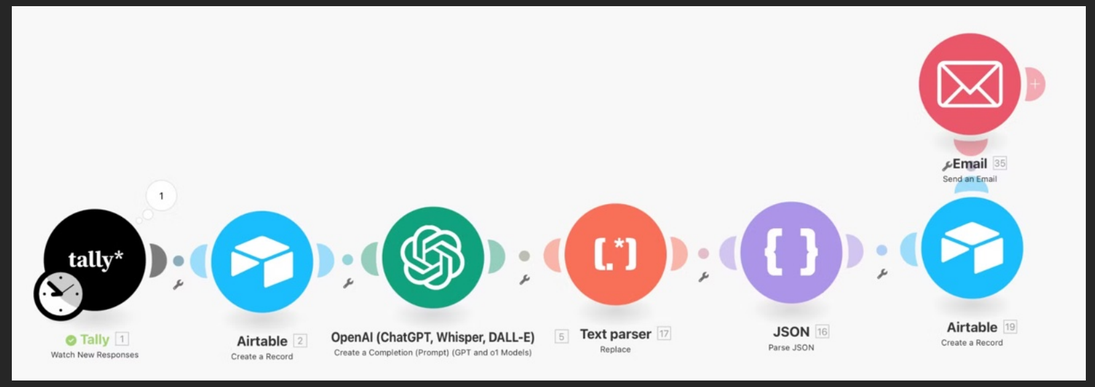

PROTOTYPING BASICS

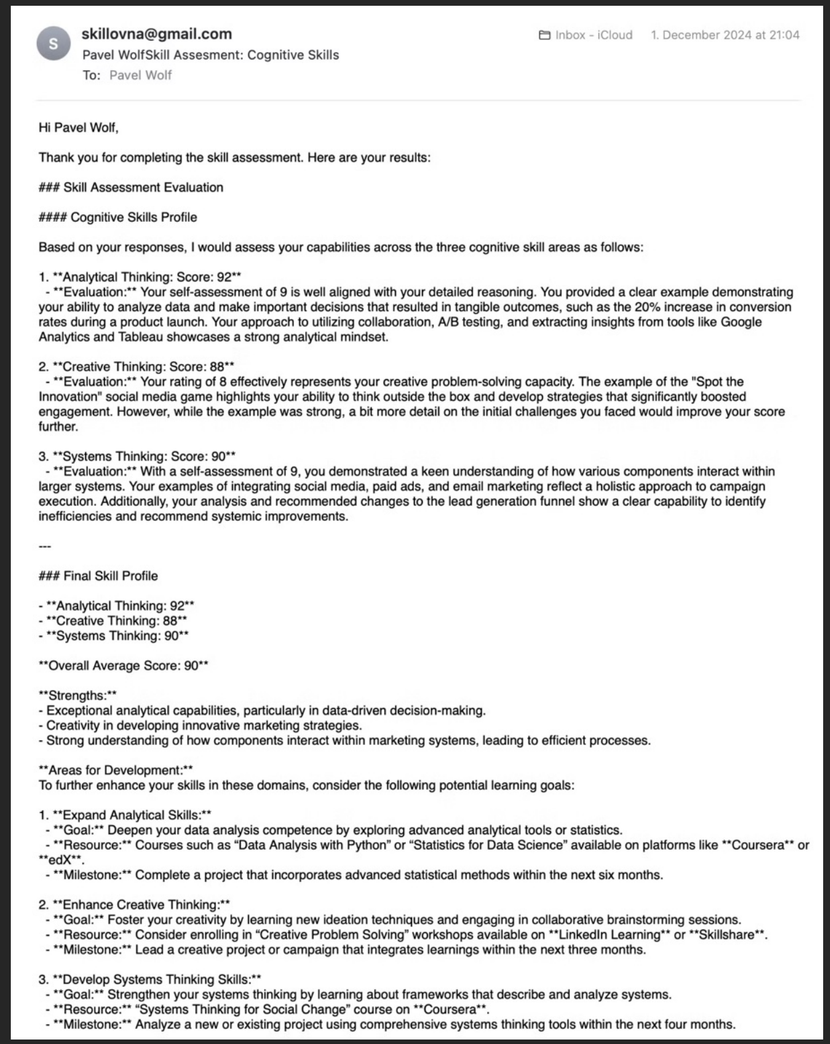

11/11/24

What did we do?

PROTOTYPE EXECUTION:

- The prototype was initially a survey crated on **Tally**
- Answers collected from this survey are then stored within **Airtable**
- Using action flow and automation in **Make** these processes are automated and stored data is then inputed to customized **ChatGPT** that operates as a skill assessment expert.
- ChatGPT provides a **JSON** file that is cleared of any undesirable texts or formats and then its structures by **JSON Parse**
- Structured data (results of the skill assessment) is then saved within Airtable.
- The data was then send to the user in a text format to an **Email** which they inputed within the the Tally survey

Pavel WolfSkill Assesment: Cognitive Skills
To: Pavel Wolf

Hi Pavel Wolf,

Thank you for completing the skill assessment. Here are your results:

Skill Assessment Evaluation

Cognitive Skills Profile

Based on your responses, I would assess your capabilities across the three cognitive skill areas as follows:

1. **Analytical Thinking: Score: 92**
 - **Evaluation:** Your self-assessment of 9 is well aligned with your detailed reasoning. You provided a clear example demonstrating your ability to analyze data and make important decisions that resulted in tangible outcomes, such as the 20% increase in conversion rates during a product launch. Your approach to utilizing collaboration, A/B testing, and extracting insights from tools like Google Analytics and Tableau showcases a strong analytical mindset.

2. **Creative Thinking: Score: 88**
 - **Evaluation:** Your rating of 8 effectively represents your creative problem-solving capacity. The example of the "Spot the Innovation" social media game highlights your ability to think outside the box and develop strategies that significantly boosted engagement. However, while the example was strong, a bit more detail on the initial challenges you faced would improve your score further.

3. **Systems Thinking: Score: 90**
 - **Evaluation:** With a self-assessment of 9, you demonstrated a keen understanding of how various components interact within larger systems. Your examples of integrating social media, paid ads, and email marketing reflect a holistic approach to campaign execution. Additionally, your analysis and recommended changes to the lead generation funnel show a clear capability to identify inefficiencies and recommend systemic improvements.

Final Skill Profile

- **Analytical Thinking: 92**
- **Creative Thinking: 88**
- **Systems Thinking: 90**

Overall Average Score: 90

Strengths:
- Exceptional analytical capabilities, particularly in data-driven decision-making.
- Creativity in developing innovative marketing strategies.
- Strong understanding of how components interact within marketing systems, leading to efficient processes.

Areas for Development:
To further enhance your skills in these domains, consider the following potential learning goals:

1. **Expand Analytical Skills:**
 - **Goal:** Deepen your data analysis competence by exploring advanced analytical tools or statistics.
 - **Resource:** Courses such as “Data Analysis with Python” or “Statistics for Data Science” available on platforms like **Coursera** or **edX**.
 - **Milestone:** Complete a project that incorporates advanced statistical methods within the next six months.

2. **Enhance Creative Thinking:**
 - **Goal:** Foster your creativity by learning new ideation techniques and engaging in collaborative brainstorming sessions.
 - **Resource:** Consider enrolling in “Creative Problem Solving” workshops available on **LinkedIn Learning** or **Skillshare**.
 - **Milestone:** Lead a creative project or campaign that integrates learnings within the next three months.

3. **Develop Systems Thinking Skills:**
 - **Goal:** Strengthen your systems thinking by learning about frameworks that describe and analyze systems.
 - **Resource:** “Systems Thinking for Social Change” course on **Coursera**.
 - **Milestone:** Analyze a new or existing project using comprehensive systems thinking tools within the next four months.

Try Pitch

PROTOTYPING BASICS

11/11/24

What did we learn?

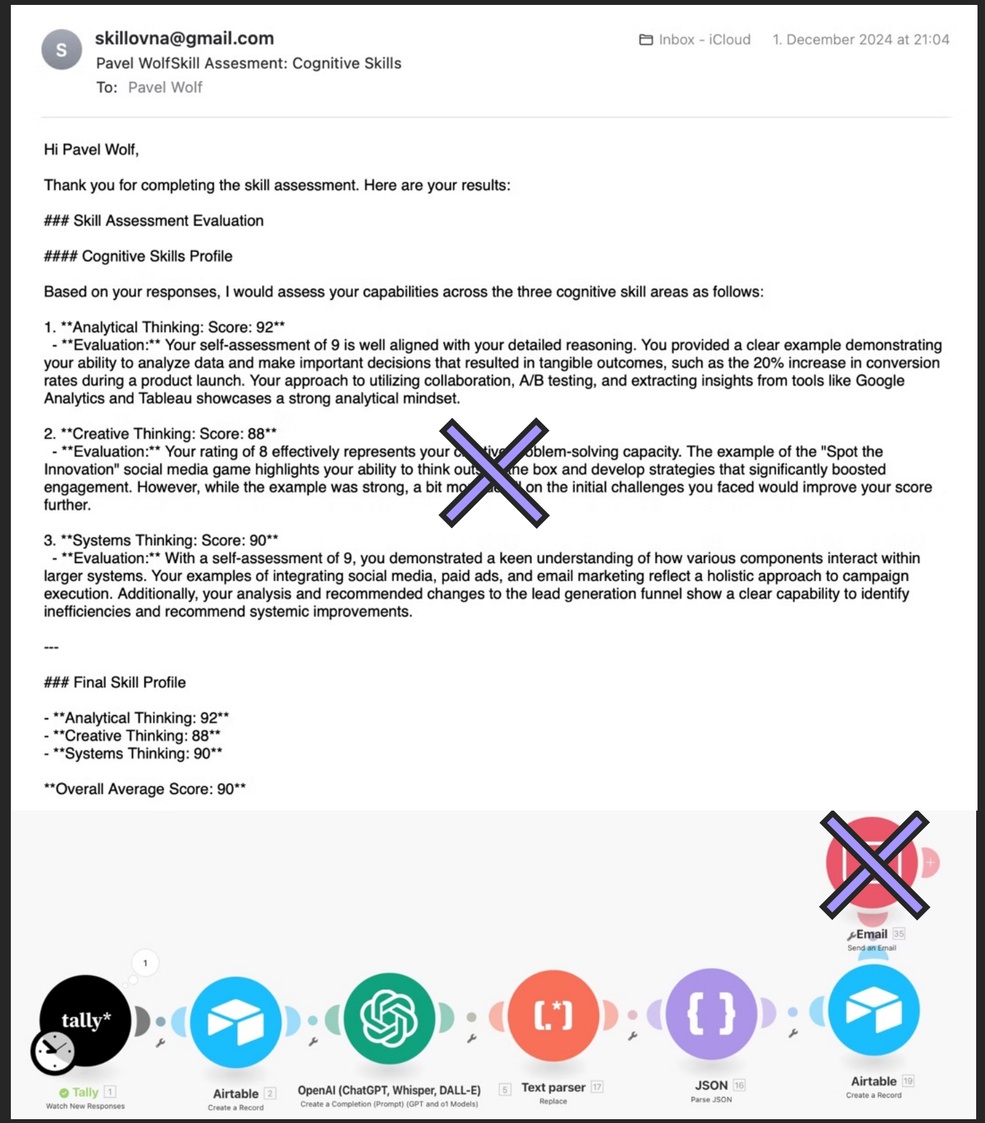

After presenting the solution to the class there were several issues we needed to address before we present our final prototype:

- **Embedding Tally within our landing page**: Having the skill assessment as external page reduces the user's attention and engagement to complete the survey

- **Embedding Result Visualization within our landing page:** Allowing the user to log-in and see their results directly within our landing page might also increase the engagement and improve user experience

- **Providing Formatted email rather than text output:** If embedding the results within the landing page is not possible, offering more structured and formatted output in an email could improve the user experience.

- **Improved landing page design:** Improving landing page design to be more striking, comprehensive, intuitive and functional is the key for achieving better click rates, higher engagement and interaction with our prototype

FINDING CUSTOMERS

18/11/24

What did we do?

- Get in 1-3 more iterations on the prototype based on data from your users
- Create a list of people you talked to and want to talk to
- Classify them according to:
- User or Customer
- What Lead stage
- What is their contact data
- Use AI to create targeted and relevant outreach

FINDING CUSTOMERS

18/11/24

What did we do?

- Based on evaluation of our customer based we defined potential "users", "customers", and "partners".
- As part of our roadmap execution we need to contact these parties, build relationships to achieve partnerships, gain insights from early adopters and transform prospects into paying customers

LEAD STAGE Prospect	Count 5			
1	HR Professionals in SMEs	Users	Prospect	Early outreach; they may benefit from improving SME training solutions but need more education.
2	Academics in Learning	Users	Prospect	Exploratory stage; valuable for feedback and potential collaborations on solution alignment.
3	Recruitment Agencies	Users	Prospect	Could use solutions to upskill talent pools for their SME clients.
4	Startup Incubators/Accelerators	Partners	Prospect	They support startups and could integrate the platform into upskilling programs.
5	Freelancers & Gig Workers	Users	Prospect	Growing market seeking self-paced and personalized learning tools.
LEAD STAGE Lead	Count 4			
6	L&D Managers	Users	Lead	Actively looking for scalable and personalized training solutions for teams.
7	Tech Consultants for SMEs	Users	Lead	Interested in offering solutions to SMEs but need tailored benefits for integration.
8	Corporate Trainers	Users	Lead	They align with innovative training solutions to improve learner engagement.
9	Educational Institutions	Users	Lead	Interest in improving practical skill training for graduates entering the workforce.
LEAD STAGE Qualified Lead	Count 4			
10	Small Business Owners	Customers	Qualified Lead	Recognize ROI in workforce development but need proof of measurable results.
11	Training Solution Providers	Partners	Qualified Lead	Potential partners who can integrate solutions into their existing offerings.
12	EdTech Companies	Partners	Qualified Lead	Potential collaborators for integrating advanced AI-driven learning solutions.
13	Mid-level Managers in SMEs	Users	Qualified Lead	They recognize team skill gaps and advocate for cost-effective upskilling tools.
LEAD STAGE Opportunity	Count 2			
14	C-Suite Executives	Customers	Opportunity	High decision-making power; require data-driven pitches on productivity and cost savings.
15	Government Workforce Boards	Customers	Opportunity	Require scalable solutions to address national skill gaps and workforce training.

ADVANCED PROTOTYPING 25/11/24

What did we do?

FINILIZED PROTOTYPE

- Taking in consideration the feedback from previous session we improved our prototype to offer valuable and present user experience:
- The prototype has several stages:

1. Through advertisement, post or another form of outreach user is directed to our landing page
2. By clicking on a button "TRY IT OUT" the user is directed to a sign-up page that allows user to request demo/prototype.
3. After signing in the user is directed to a new interface that allows them to access the skill assessment tool
4. The skill assessment tool is still created by Tally but is now embedded within the landing page
5. Answers collected from this survey are then stored within **Airtable**
6. Using action flow and automation in **Make** these processes are automated and stored data is then inputed to customized **ChatGPT** that operates as a skill assessment expert.
7. ChatGPT provides a **JSON** file that is cleared of any undesirable texts or formats and then its structures by **JSON Parse**
8. Structured data (results of the skill assessment) is then saved within Airtable.
9. The results are then displayed under the "RESULTS" page that can be opened either through button "VIEW RESULTS" or from the user's profile

FINAL PITCH

14/12/24

What did we do?

- While preparing for the final presentation we wanted to make sure that we deliver smooth, comprehensive, compelling and entertaining presentation
- When it comes to the content of the presentation we tried to focus on the presentation of our prototype with real data that backed up our decisions during this project
- We decided to follow suggested structure:
  - Describe the problem
  - Use data to validate your problem
  - Highlight our own research and interview insights
  - Showcase our solution in a form of a prototype
  - Validate the need of our solution
  - Showcase our position within the market
  - Explain our business model
  - Present our road map and next steps
  - Present our team
  - End with a call to action

Try Pitch

FINAL PITCH

14/12/24

What did we learn?

- Probably a lot of data you need to get started, which might reduce customer adoption.
- Is there a motivation for employers to purchase this for the entire company?
- What are the actions for the employees to take?
- Can they jump on programs? Can you track progress?
- Make clearer that you are a platform model and then you have a complete different business model.
- Probable and convincing, but not backed up by much; your value for the market size seems very high (370b EUR?)
- Strategically dangerous choice to be in the "middle of the road" between premium and affordability
- Are you in the "affordable" camp, but aim to offer premium quality services?
- What is your core offering?
- Highlight your backgrounds more with logos - it's impressive
- Competition Slides do not look complete.
- Uncommon choice to not put you on the top right.
- Cost is not a good metric to succeed in, there will always be someone willing to do your work for less.
- Should speed up videos during less important parts
- You should always add a call-to-action.
- Can you highlight more why existing solutions from Udemy, to Duolingo, to Executive Trainings are not working?
- I think the Problem ist not a huge problem. Product is more like a nice to have

BE PROUD

Problem is easy to understand | Probable and convincing | Good looking presentation | Strong presentation | Great Pitch Deck design | Cool presentation, good stats| Really cool design (in my opinion)

FINAL PITCH

14/12/24

What did we learn?

- The feedback we got on our pitch and prototype presentation were very valuable and provided us with necessary insights to improve not only our presentation but also our product, business model and market positioning strategy.
- The key elements that we need to focus on are:
  - Backing our statements with more data
  - Making sure that our solution is presented in comprehensive way, that explains the whole concept as well as highlights the value proposition
  - Highlighting our competitive advantage
  - Highlighting how do we differ in comparison to the others
  - Highlighting the customer motivation to choose our product
  - Highlighting our market position
  - Finding different domains in which we can demonstrate our strong position (price is not a great measure/domain)
  - Highlight our backgrounds even stronger
  - Need for call to action statement
